Subject : ATR INOP TOGW CALCULATION

This is with reference to a recent reporting regarding usage of ATR TOGW charts with an inoperative system which were not updated.

After root cause analysis and discussions with stake holders, relevant policy is established and being circulated for Performance regulated TOGW calculation in case of operations with a system inoperative causing effect on performance regulated TOGW.

Operation Engineering Procedures Manual (OEPM) Edition -1 Rev:00, Chapter 12 , Computation of Takeoff Gross weight (TOGW) describes the procedure for issuing TOGW charts.

The following steps will be added to the existing procedure:

Operation Engineer will provide the required data as and when required.

In case Operation Engineer is not available then duty Dispatcher will provide the required data as per FCOM/AFM Deviation guide procedure.

Thirdly where both these options are not available crew will work out the required data.
