Subject : AMENDMENT TO THE TECHNICAL INSTRUCTIONS FOR THE SAFE TRANSPORT OF DANGEROUS GOODS BY AIR (DOC 9284) RELATING TO POWER BANKS

Reference is made to International Civil Aviation Organization Electronic Bulletin EB 2026/10 dated 7 April 2026, concerning [AMENDMENT TO THE TECHNICAL INSTRUCTIONS FOR THE SAFE TRANSPORT OF DANGEROUS GOODS BY AIR \(DOC 9284\) RELATING TO POWER BANKS](#). The bulletin has been uploaded on the Crew App Manuals for ready reference.

The bulletin clearly stipulates:

The restrictions do not apply to power banks carried by crew to fulfil operational requirements. However, they do apply to power banks carried by crew for personal use.

In light of the above, crew are advised that power banks may be used onboard strictly for operational purposes, specifically to recharge official company-issued iPads during flight. Under no circumstances are power banks to be used for charging personal electronic devices.

All crew members are requested to ensure strict compliance with this directive.
